CONTENTS OF VOLUME 35

Number 1

S. C. Saxena and A. N. Kasi	1	Fluidized-bed incineration of paper pellets
Neeta Sharma	25	Recycling of organic wastes through earthworms: an alternate source of organic fertilizer for crop growth in India
G. N. Tiwari, Pankaj Saxena and K. Thakur	51	Thermal analysis of active solar distillation system
E. E. Elmadbouly and M. Abdulsadek Nour	61	Modelling, simulation and sensitivity analysis of a straight pneumatic pipeline
Chih Wu	79	Analysis of an endoreversible Rallis cycle
N. Lemnean, I. Dogaru, L. Katona and M. Cârdu	87	On the achievement of some experimental MHD power generators

Number 2

Ömer Çomakli, Bedri Yüksel, Y. Ali Kara, Abdullah Çağlar and Yahya Tülek	91	Heat pump utilization in milk pasteurization
Rajka Budin and Alka Mihelić-Bogdanić	97	Application of solar energy in drying processes
V. K. Sharma, A. Colangelo, G. Spagna and F. Pistocchi	105	Preliminary economic appraisal of solar air heating system used for drying of agricultural products
M. Arulanantham, T. P. Singh and N. D. Kaushika	111	Convective heat transfer across transparent honeycomb insulation materials
T. P. Singh and N. D. Kaushika	117	On the stability theory of salt gradient solar ponds
Ömer Çomakli and Fikret Yüksel	121	Experimental investigation of the exergetic efficiency of air-heating flat-plate solar collector with distorted plates
S. C. Tripathy	127	Electric drive for flywheel energy storage
Surendra B. Prasad	139	Automatic feedwater flow control for a monotube boiler

S. C. TRIPATHY and M. HARIDAS 151 A novel computer software for calculating optimum location and ratings of a shunt capacitor for loss reduction in distribution feeders

S. C. TRIPATHY 159 Digital speed governor for steam turbine

Corrigendum 161

Number 3

R. S. MISRA 173 Performance evaluation of some pressurized and non-pressurized thermosyphonic solar water heating systems

R. S. MISRA 193 Thermal stratification with thermosyphon effects in solar water heating systems

R. S. MISRA 205 Techno-economic optimization of thermosyphonic solar hybrid water heating systems

M. S. SODHA and RAM CHANDRA 219 Solar drying systems and their testing procedures: a review

Number 4

STEFAN BACHU, W. D. GUNTER and E. H. PERKINS 269 Aquifer disposal of CO_2: hydrodynamic and mineral trapping

VALENTINA S. BAJOVIĆ 281 The correct quasi-one-dimensional model of the fluid flow in a Faraday segmented MHD generator channel

M. SANTAMOURIS, E. DASCALAKI, C. BALARAS, A. ARGIRIOU and A. GAGLIA 293 Energy performance and energy conservation in health care buildings in Hellas

SANJAY GUPTA 307 Utilization potential of solar energy in the Indian silk industry

KORNELIS BLOK and WIM C. TURKENBURG 317 CO_2 emission reduction by means of industrial CHP in The Netherlands

B. SUDHAKARA REDDY 341 Biomass energy for India: an overview

G. THOMAS BELLARMINE and MARK C. TURNER 363 Energy conservation and management in the U.S.

Number 5

PANAYIOTIS J. KARDITSAS 375 Non-equilibrium MHD channel theory and numerical simulation

A. Argiriou, D. Asimakopoulos, C. Balaras, E. Dascalaki, A. Lagoudi, M. Loizidou, M. Santamouris and I. Tselepidaki — 385 — On the energy consumption and indoor air quality in office and hospital buildings in Athens, Hellas

G. Mihalakakou, M. Santamouris and D. Asimakopoulos — 395 — On the cooling potential of earth to air heat exchangers

M. Zaheer-uddin — 403 — Multivariable integral control of hydronic heating systems

J. Soma — 413 — A natural enthalpiomass ecological examination of the Compton effect reveals selective crosscloning of intrinsic properties

Yousef S. H. Najjar — 433 — Performance of simple cycle gas turbine engines in two modes of operation

M. S. Bhatt, K. Srinivasan, M. V. Krishna Murthy and S. Seetharamu — 443 — Absorption–resorption heating cycles with the new working pairs R21-NMP and R21-DMA

Technical Note
G. N. Tiwari, A. K. Singh and P. S. Bhatia — 453 — Experimental simulation of a grain drying system

Number 6

C. Wu and W. Schulden — 459 — Specific heating load of thermoelectric heat pumps

Mircea Cârdu and Constantin Cazacu — 465 — Essentials of the ICPET-SA experience to use bituminous shales in order to produce power

Gabriel Boicu and Mircea Cârdu — 473 — Achievements in the urban garbage incineration plant field

Alexandru Artino and Mircea Cârdu — 477 — Electrostatic precipitators used in the ecological conversion of power in coal-fired thermoelectric power plants

W. Smolec and A. Thomas — 483 — Problems encountered in heat transfer studies of a Trombe wall

Sarjinder Singh, Surendra Singh, C. J. S. Pannu, B. S. Bhangoo and M. P. Singh — 493 — Energy inputs and crop yield relationships for wheat in Punjab

Mohammed Ahmed Hamdan — 501 — Thermal gains through windows

T. Matsuo, M. Ishikawa and J. Umoto — 507 — Numerical analysis of bifurcation phenomena in supersonic MHD generator with supersonic diffuser

M. Altamush Siddiqui — 517 — Economic analyses of the operating costs in four absorption cycles for optimizing the generator and condensing temperatures

G. N. Tiwari, P. S. Bhatia, A. K. Singh and Roy. F. Sutar — 535 — Design parameters of a shallow bed solar crop dryer with reflector

A. V. Narasimha Rao, S. Subramanyam and T. L. Sitharama Rao — 543 — Performance of east/west plane booster mirror

Number 7

A. Thomas and Satish A. Thomas — 555 — Design data for the computation of thermal loss in the receiver of a parabolic trough concentrator

A. Thomas — 569 — Simple structure for parabolic trough concentrator

A. Thomas and Halil M. Guven — 575 — Effect of optical errors on flux distribution around the absorber tube of a parabolic trough concentrator

S. Sinha, Sanjay Kumar and G. N. Tiwari — 583 — Active solar distillation system—an investment alternative to a solar hot water system

S. Sinha and G. N. Tiwari — 589 — Energy conservation of conventional fuels by use of solar energy

Shail, M. S. Sodha, Ram Chandra, B. Pitchumani and J. Sharma — 597 — Effect of coal properties on the specific coal consumption in a typical thermal power station in India

Ram Kumar Agarwal and H. P. Garg — 605 — Study of a photovoltaic–thermal system—thermosyphonic solar water heater combined with solar cells

H. P. Garg, R. K. Agarwal and J. C. Joshi — 621 — Experimental study on a hybrid photovoltaic–thermal solar water heater and its performance predictions

Wagdy R. Anis and M. Abdul-Sadek Nour — 635 — Performance analysis of PV system for maximum utilization of solar radiation

N. S. Dixit, T. K. Thiyagarajan, P. Satyamurthy and N. Venkatramani — 643 — Experimental study on the effect of insulating vane and interaction parameter on current and voltage in a liquid metal MHD generator

Number 8

Moncef Krarti — 651 — Heat loss and moisture condensation for wall corners

R. Ramanathan and L. S. Ganesh — 661 — A multi-objective evaluation of decentralized electricity generation options available to urban households

Sanjay Kumar, G. N. Tiwari and N. C. Bhagat — 671 — Amalgamation of traditional and modern cooling techniques in a passive solar house: a design analysis

M. S. Sodha, R. L. Sawhney and D. Buddhi — 683 — Use of evaporatively cooled underground water storage for convective cooling of buildings: an analytical study

C. S. Prasanna Kumar, S. P. Sabberwal and A. K. Mukerjee — 689 — Some limitations in the use of discharge lamps

Abdel-Monem A. El-Bassuoni and Aghareed M. Tayeb — 693 — Factors influencing the performance of basin-type solar desalination units

R. S. Pawar, M. G. Takwale and V. G. Bhide — 699 — Evaluation of the performance of the solar air heater

Sangeeta Dube and S. L. Sharma — 709 — Studies in photochemical conversion of solar energy: simultaneous use of two dyes with mannitol in photogalvanic cell

Mamdouh Abd El-Hamid M. Zaki — 713 — Dynamics of water waves interaction with wind-driven currents

S. P. Singh — 721 — Optimization of earth–air tunnel system for space cooling

S. N. Mumah, S. S. Adefila and E. A. Arinze — 727 — Properties generation procedures for first and second law analyses of ammonia–water heat pump system

S. N. Mumah, S. S. Adefila and E. A. Arinze — 737 — First law thermodynamic evaluation and simulation of ammonia–water absorption heat pump systems

Number 9

S. K. Chou, Y. W. Wong, W. L. Chang and C. Yap — 751 — Efficient energy performance of large commercial buildings in tropical climates

Wagdy R. Anis and M. Abdul-Sadek Nour — 765 — Switching mode photovoltaic pumping system

Sanjay Kumar and G. N. Tiwari — 775 — Analytical study of summer/winter houses

N. M. Nahar, R. H. Marshall and B. J. Brinkworth — 787 — Studies on a hot box solar cooker with transparent insulation materials

I. Olwi, M. B. Habeebullah and A. Khalifa — 793 — Towards convenient solar cooking: experimental results of an indoor model

D. K. Shyamal, A. Chakraverty and H. D. Banerjee — 801 — Thermal properties of raw, parboiled and debranned parboiled wheat and wheat bulgur

Y. P. Yadav, Y. N. Prasad and Arun K. Yadav — 805 — Water temperature as a function of time and space coordinate in a collection-cum-storage solar water heater

MIRCEA CÂRDU and VIRGIL ATANASIU — 815 Results of the international cooperation in the thermopower equipment achievement field

Number 10

P. C. LUND, Y. SHINDO, N. NAKASHIKI and T. OHSUMI — 827 A simulation model and a thermodynamic database for the system sea water/liquid CO_2 at large depths

SANJAY KUMAR, G. N. TIWARI and S. SINHA — 835 Optimization and comparative thermal evaluation of four different solarium-cum-solar houses

AFIF HASAN — 843 Thermal energy storage system with stearic acid as phase change material

D. A. KOUREMENOS, C. D. RAKOPOULOS, D. T. HOUNTALAS and A. D. KOUREMENOS — 857 The maximum compression pressure position relative to top dead centre as an indication of engine cylinder condition and blowby

S. C. KAUSHIK, A. DUBEY and M. SINGH — 871 Steam Rankine cycle cooling system: analysis and possible refinements

S. E. ALY and K. A. FATHALAH — 887 Waste heat driven radially cooled rotary dehumidifier (RCRD)

Number 11

T. LEWIS THOMPSON, NADER V. CHALFOUN and MARTIN R. YOKLIC — 909 Estimating the performance of natural draft evaporative coolers

M. ZAHEER-UDDIN and G. R. ZHENG — 917 A VAV system model for simulation of energy management control functions: off normal operation and duty cycling

C. L. THAKUR, N. K. KHANDELWAL and J. P. MITTAL — 933 Energetics and economics of wheat production in two selected villages of Madhya Pradesh, India

ABDEL-SALAM H. HAMZA and NAGAT M. K. ABDEL-GAWAD — 943 Behaviour of transmission line towers under lightning surge conditions

HASSAN E. S. FATH — 955 Transient analysis of naturally ventilated greenhouse with built-in solar still and waste heat and mass recovery system

JAI PRAKASH — 967 Transient analysis of a photovoltaic–thermal solar collector for co-generation of electricity and hot air/water

S. O. ONYEGEGBU, J. MORHENNE and B. NORTON — 973 Second law optimization of integral type natural circulation solar energy crop dryers

Hassan E. S. Fath and M. Khodheer	985	Natural convection heat transfer in horizontal annulus with an open trough (black body solar energy receiver)
M. A. El Tawil and M. H. Kamel	991	MHD flow under stochastic porous media
Basem S. Attili	999	On the numerical study of the vapor flow characteristics of a slender cylindrical heat pipe

Number 12

Jincan Chen	1009	Optimal performance characteristics of a solar-driven heat pump at maximum COP
Valentina S. Bajović	1015	Further experimental investigation of the correct Q1D electrodynamical part of a model for the fluid flow in a Faraday segmented MHD generator channel
V. K. Srivastava and R. K. Jalan	1031	Predictions of concentration in the pyrolysis of biomass materials—I
A. Venkatesh	1041	Experimental observations on a continuous flow type domestic solar water heater
G. V. Reddy and S. K. Mohapatra	1049	A mathematical model for exit gas composition in a 10 MW fluidized bed coal combustion power plant
A. Mani and S. Srinivasa Murthy	1061	Analysis of an open type flat plate collector for tannery effluent treatment
E. Worrell, J. G. de Beer, A. P. C. Faaij and K. Blok	1073	Potential energy savings in the production route for plastics
Abdel-Salam H. A. Hamza	1087	Transmission line tower representation and its effect on the tower surge response calculation
Abdel-Salam H. Hamza and Nagat M. K. Abdel-Gawad	1097	Digital computer studies of the surge response of a transmission line tower
Abdel-Salam H. Hamza and Nagat M. K. Abdel-Gawad	1107	Investigation of overvoltages in a gas insulated substation (G.I.S.) caused by a lightning stroke
Süleyman Özkaynak and Selahattin Göktun	1117	Effect of irreversibilities on the performance of a thermoelectric generator
Wagdy R. Anis and M. A. Nour	1123	Optimum design of a photovoltaic powered pumping system
K. S. Chen, S. T. Tsai and Y. W. Yang	1131	Heat transfer performance of a double-loop separate-type heat pipe: measurement results
B. A. Jubran, M. A. Al-Saad and N. A. Abu-Faris	1143	Computational evaluation of solar heating systems using concrete solar collectors

OLAFUR P. PALSSON and HANS F. RAVN	1157	Stochastic heat storage problem—solved by the Progressive Hedging Algorithm
M. A. C. CHENDO	1173	Towards sustainable renewable energy technology in Africa
